### Description:

JobSpark is a mobile app that helps users search for jobs via a well-structured and interactive interface. The app is minimalistic and elegant in design, allowing job seekers to see existing vacancies, register, and manage their applications in a single place. The app starts off with sign-up pages that introduce users to its main feature and then provides sign-up and login features for secure access. Once users log in, they get a clean main interface through which they can browse job categories, check company details, and see full job descriptions that include details about roles and requirements.

With searching and filtering, users have a way to narrow down searching by location, type of job, or category, so it's easier. Interactive job posting cards enable users to view information and apply within the app itself using a smooth and easy workflow. Profile management is also included in the app, so that users can control personal information, track applications, and save prospects to return to later.

JobSpark's design keeps to the 60-30-10 color rule. Light blue is applied as the base color, which gives a professional and friendly atmosphere. White is applied as the secondary color to offer transparency and usability, with contrasting colors like black and red applied to highlight important actions like "Apply Now" or notices. This not only makes it more usable but also gives the app a clean and integrated look. JobSpark's basic function is to allow job seekers to connect with the appropriate opportunities in a timely, simple, and organized way. With its clean design, user-friendly navigation, and instant interaction, the app allows users to search, apply, and track their career options uninterruptedly from a single location. If you're a student, recent graduate, or a working professional, JobSpark is an insider's manual to modern-day job searching.

### Key Features:

- Onboarding Screens, Simple introduction to guide new users about the app.
- User Registration & Login, Secure account creation and login for job seekers.
- Job Listings, Browse available job opportunities with clear details.
- Search & Filter Options Find jobs easily by category, location, or type.
- Job Application, Apply directly for jobs through the app.
- User-Friendly Interface, Clean design with simple navigation using ConstraintLayout and Linear Layout.
- Profile Management, Users can manage their personal details and track applications.

### Target Audience:

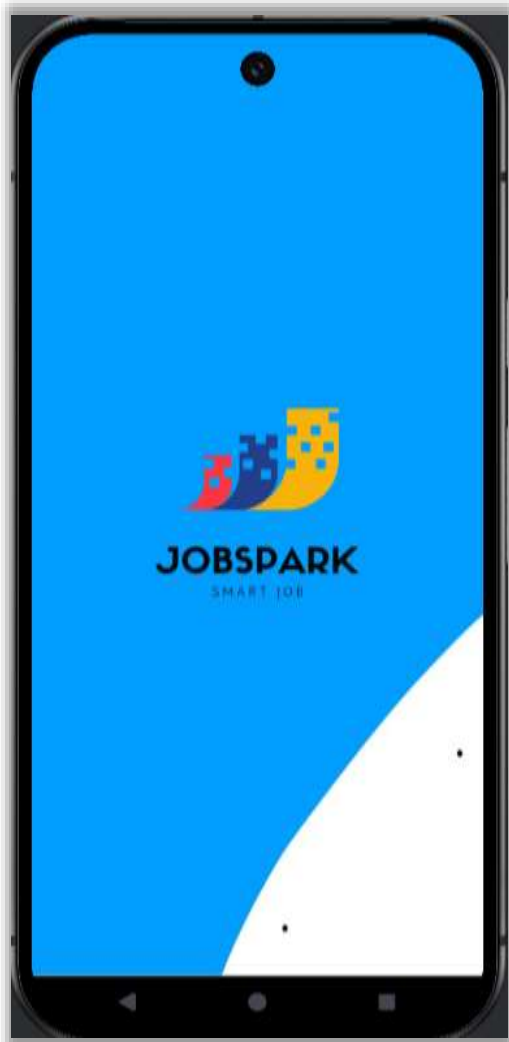

- Students and Recently Passed-out Graduates, looking for internships or first-level job opportunities.
- Unemployed People, actively searching for new job opportunities.
- Working Professionals, looking for growth opportunities or better opportunities.
- Part-time and Freelance Job Applicants, looking for flexible or remote job opportunities.

### Applying the "60-30-10 Rule" in Choosing the Colors

In creating a business, modern, and friendly look for JobSpark, I applied the 60-30-10 color rule. It ensures a simple appearance and an aesthetically pleasing appearance.

#### 60% Light Blue (#519DCC) Primary Color The Foundation

Light Blue serves as the main background and theme color across the app. It symbolizes trust, stability, and professionalism, which are highly essential for a job searching platform. The light yet energizing tone gives a clean and motivating climate, making it easier for users to focus on job openings.

#### 30% White (#FFFFFF) Secondary Color The Support

White is used for content fields, input fields, and text areas. It is minimalistic and uncluttered, offering readability as well as legibility. White space reduces clutter and guides the user towards important things, including job listings, buttons, and profile data.

#### 10% Black (#FF000000) & Red (#E20000) Accent Colors The Highlights

Black is used on text, icons, and items that must be highlighted strongly. Red is used to highlight warnings, errors, or critical actions, such as Apply or Alerts. These highlights ensure that the most crucial buttons and interactive elements are well highlighted, making the interface interactive and simple to use.

By following the 60-30-10 rule, JobSpark acquires an equally weighted, modern, and professional appearance. The scheme conveys dependability and energy and pushes users to attempt opportunities while offering a hassle-free and enjoyable app experience.
